1. This communication is in response to applicant's amendment received on May 4, 2004.
2. Claims 6-20,24-27 are allowed.
3. The following is an examiner's statement of reasons for allowance: As pointed out by the applicant, in the response filed on May 4, 2004, certain key features of the claimed invention are not taught or fairly suggested by the prior art. Specifically, the prior art fails to show a magnetic field sensor with a multilayered structure having a single layer of a first one of the magnetostrictive and piezoelectric material and two layers of the second one of the magnetostrictive and piezoelectric material positioned so that the single layer of the first material lies between the two layers of the second material (claim 8) or a magnetostrictive material substrate and a plurality of piezoelectric stripes on a surface of the substrate (claim 14). Because none of the prior art teaches or suggests this element, this feature, taken together with the other limitations of the claims renders the claims allowable over the prior art.
4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should

preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jay M. Patidar whose telephone number is 571-272-2265. The examiner can normally be reached on M-Thur 7:00-5:30.
